Mines and Prospects--Furnaces and Mills

A Big Strike in Boston Con.

Sensational Percentages in the Red Metal, Accompanied by a Fine Average in the Yellow.

To the cluster of hig ore bodies that have characterized the development of Boston Consolidated at Bingham has just been added another, said Manager Johnson during the day, and while the real extent of it has not been delineated enough is now known to justify its classification with the most important disclosures ever made in the camp of copper. The feature of the latest development which appeals most vigor-ously to the miners of the camp is the percentage of copper that has been repercentage of copper that has been vealed, picked samples rising to sensational heights, while the result of seven samplings disclosed an average of 11 per cent of that metal with \$5 gold and five ounces silver per ton. The new ore-body over which there is not a little exultation among local interests was encountered upon a new level fifty feet above the Peabody tun-tel and 100 feet below Work tunnel. Connection with it was made a week ago, said the management, since which ago, said the management, since which time it has been driving in a solid mass of ore, the face samples in the level increasing as it has advanced from 7.8 per cent copper to 15.8, while the gold and silver have maintained uniform figures. While the channel on this horizon has not been cut across yet, it is known to possess a width of 160 feet on the Peabody level fifty feet below with a width of 160 feet in the Work tunnel 100 feet above. It is upon the stopes of the latter that the management has been drawing for ores that ment has been drawing for ores that are now going to the smeller, the controls on which a settlement was yes-terday made, showing 5.2 per cent cop-per, \$4.80 gold and four ounces silver. Of the ore now coming to the valley furnaces over 7000 tons will have been delivered for the month, while there is nothing but the capacity of the smel-ter to prohibit the company from doubling this tonnage in September. The mine is, indeed, a whale among the school of whales at Bingham.

CAMPAIGN AT ELY.

Utah Talent Tells of Development in the Old Nevada Camp.

After an absence of more than a year, during which period he has been blocking the wealth of the Giroux Con, at Ely, Nev., and preparing it for the operation of furnaces, L. C. Doty, a former superintendent of the Eureka Hill the west yesterday to remain indefi-nitely. Of Edy, in which not a small amount of Utah capital is Invested, Mr. Doty says the work of another year should place it upon a most pro-ductive baris. In the Giroux has been exposed a very large amount of ore that can be easily and inexpensively re-duced with a furnace with which it will probably be equipped in a short time.
At the properties of the Nevada Copper Mining company, consisting of the Ruth group of mines, the first unit in the mill with which it is being equipped under the direction of James B. Fleming, formerly of the Silver King of Park City, is to go into commission the present week. Constructed to treat twenty five tons of copper-bearing sulphides daily, the capacity will be increased to several as soon as the efficiency of the

In the camp, said Mr. Doty, some other development is being prosecuted, and certainly it holds out much en-couragement to the mirer. He will probably accept one of a number of propositions held out to him to remain in this State, while a large number of mining men are making his return

the output should be heavy and con-

TUNNEL AT NEWHOUSE.

The Long Avenue Now Making Rapid Strides to Completion.

The interval between the two head ings from which work on the Newhouse tunnel at Newhouse out of Frisco is being dispatched has now been reduced to less than 1300 feet, according to the weekly log that reached the managerial deek yesterday, and that avenue which undermines the g copper-bearing zone for 580 feet will be completed in abundant time to meet the requirements of the mill now hurrying to completion, is positively as-sured. While there has been some de-lay in getting the compressor at the upper or mine heading that equipment went into commission yesterday morn-Ing, and everything is now in readi ness for a new record on the tunnel Meanwhite work on the raises is progressing steadily. The three-compart-ment raise has now connected the third ment raise has now connected the third and fourth levels, while the chart from the bonanza indicates the connection between the fifth and sixth will be ac-complished in the next forty-eight hours. Anticipating the needs of the mill the big stopes are being started in the ore bodies, while to expedite construction at the concentrator Superintendent Dederiche is sending down a holst with which to raise the fittings and lower them into their piches. situation throughout is a most gratify-

California's New Strike.

Exploiting the California's recent strike in Keetly ground, the Park City Miner says: "The Keetly ground, in which the latest strike was made, was acquired about three years ago and very little work has been done on it. The body of ore was encountered in an upraise from the 35-foot tunnel and is about twenty feet thick. It is a fine milling ore and there thick. thick. It is a fine milling ore and there are seams that carry over 60 per cent lead and 14 ounces of aliver. Over fifty tons and M ounces of silver. Over fifty tons
f ore taken from the upraise are now on
the dump and Manager Snyder estimates
t will run about 25 per cent lead and at
east 10 ounces of silver."

DAY ON 'CHANGE.

Traders Generally Firmer, With Columbus Moving Up the Pike.

The week on the mining exchang opened on the sale of 16,075 shares of stock, for which \$4783.75 was paid and with the shopkeepers presenting a bolder front than at any period in a moon of two. Columbus Con., which has been detwo. Columbus Con., which has been developing strength as the concentrator, with which it is being equipped, advances toward completion, sold up to \$1.3, with Daly West maintaining a %rm position around, \$12.50 while the Judge was gobbled up at \$4.60, with \$1.45 held out to Mammoth. Star Con, which has another lot of gold-bearing rock on the way to Bingham Con, fornaces, moved up to 15 cents, while Con. Mercur permitted a single lot to go over the counter at 25 cents, with the Yankee firm and in gold demand, up to 35½ cents. Bonanza of Goldfield tucked away the proceeds of another lot of shares from the treasury, which sold at 5 cents, the day closing on the following market:

GALENA KING ORES."

New Strikes Opening Up as Development Progresses.

Clark Knight, manager of the Galena King of Stockton, who was among the arrivals from camp yesterday, verifies all the good things said of it and the recent development of ores now coming to the smelters, as the channel is opened up on the strike. On the 300-foot level the new station has been cut out in ore, with drifting to the west channel to follow at once. Manager Knight feels that there is no bigger mine with corresponding de-velopment in the old camp, and is pro-ceeding to demonstrate.

New Beck Mill

Active Construction to Be Inaugurated by the Messrs. Peck in a Short Time.

While the inability of the contractors to get lumber upon the ground has delayed construction the new zinc plant with which the Horn Silver mines at Frisco are being equipped, it will no doubt be ready to go into commission around the first of December, said W H. Peck, one of its founders, yesterday. Meanwhile not a little of the machinery has been delivered on the ground, with other consignments following, and asother consignments following, and as-surances continue to come from Ore-gon and the Wood river country in Idaho that the delivery of lumber will be on a more liberal scale from this time. Of results at the plant there is no doubt whatever, says Mr. Peck. On the contrary they will no doubt open the eyes of the mining fraternity to the importance of zine mining tratermly to the importance of zine mining as an industry, and in a few years the revenues from that source should compare favorably with those from any other in the great industry in this state. Of the projected plant at the Builfon-Beck, Mr. Peck says it will positively be constructed along the lines previous-ly indicated, with construction to be-gin as soon as that at the Horn Silver has progressed that it will not requir their undivided attention. The Peck method for the concentration of silverlead ores at the Beck company's mines in Tintic promises to do as much for those interests as the treatment of the zine product promises the Horn Silver, added the visitor, and at each the founders promise lessons in the metallurgy of Utah ores for which the miner has long waited. Of these argentiferous lead ores, containing fractional val-ues in gold the company has a large volume exposed and the earnings from that source Mr Peck feels assured, shall be made to add materially to the company's financial relief.

STOPING AT BINGHAM.

Methods Employed in Drawing Upon Its Enormous Ore Bodies.

Square-setting in the extraction of the huge ore bodies at Bingham is made the subject of a most instructive contribution to the latest number of the Engineering and Mining Journal of New York by Louis S. Cates. The clinic which will be studied with profound nterest, is most intelligently illustrated and earns a place in any scrap book. In his introduction Mr. Cates writes: "The ore occurs in large shoots varyng from fifty to 200 feet in width, from 100 to 200 feet in length, and in some cases have been proven to be continuous in depth for over 600 feet. These chambers or shoots in most cases have well-defined footwall of quartzite and a hanging of limestone, although some have been found imbedded entirely in the lime. There is no well-defined dip to these bodies as with the veins, and they are found varying in dip from the

horizontal to the vertical.
"The ore is heavy, running about nine cubic feet to the ton, and carries on an average 25 to 30 per cent Iron, 20 to 25 per cent silica, 2 to 5 per cent copper. \$1 to \$3 gold, and one to four ounces silver. In mining this are great care is exercised, for it is not uniform in texture, changing in a very few feet from hard compact sulphide to a soft dielntegrated silicious ore, which, unless caught up, will run and cause a cave. The large size of the ore-bodies, the variable texture of the heavy ore, and the added disadvantage of having a heavy hanging wall, have made it necessary for the square-set system to be iniversally used in mining the large

Silver-Lead Ore Shipped.

pounds of lead-silver ore yesterday from
here to the sampler at Murray.

The Newport and Nevada Mining and Milling company at Deer Lodge expects to make a trial mill run of ores from the Snowlake property in a few days.

Boston Coppers Higher.

Special to The Tribune.

BOSTON, Mass., Aug. 29.—The local market opened with a rush and copper shares were well advanced above the Saturday close. Utah was again a feature and large lots were traded in, the buying being more noticeable than the seiling. The entire list showed remarkable strength. Bingham advanced over three-quarters of a point and was largely traded in. The tone of the market is excellent, and there seems to be evidence that higher prices are to be looked for in the future. The cheaper coppers did not appear to be as strong as they were hast week when they were the favorites, but still they retained their strength, while the higher-priced issues are said to be in very strong hands and not very much stock for sale. The closing was fractionally lower than the highest for the day Hornbiower & Weeks, brokers, 53 State street, Boston, and 19 Wall street, New York, furnish the following quotations:

A New Crowd Seeks the Control

An Appeal to Daly West Shareholders From the East to Overthrow Present Organization.

In another niche in this number of The Tribune will be found an appeal to Daly West shareholders. The "notice" originates in the East, where, according to advices, it is scheduled to appear in other lending dailies and is an invitation to minority interests who have been disquieted by recent declines, Eastern criticism and street talk to rally for the purpose of organizing. The notice which appears as an advertise-ment is constructed as follows:

"Co-operation of shareholders of the Daly West Mining company is invited for the purpose of organizing a Shareholders' Protective Committee; the committee to ask for proxies for the annual election, examine property, investigate the present management and advise members for the protection of share-

The purpose of the appeal is quite manifest and no doubt gives notice of a fight for a new household at the next session of the shareholders. A letter accompanying the advertisement says t is impossible to conceal the fact that any shareholders are dissatisfied with at least a portion of the present board of directors and that a determined effort will be made to reorganize it. It is also alleged that some now eccupy-ing positions on the board have parted with practically all of their holdings and that an inventory will sustain it. "We believe," says the letter, "the present management has been derelict present management has been derelict in its duty to the stockholders in that they have sold stock at a larger figure and now control the property without any corresponding holdings."

PLAYING UTAH CON.

Eastern Talent Now Watching Its Advance to \$50 Per Share.

Brokers say they are walting to se-Utah pass the \$40 point to advise its purchase. They say that when all the stock is cleaned up around \$40 the advance to \$50 should be steady. The enlarged operations of the property should take in some lower grade ore," says the News Bureau of Boston. "Utah should not be reckoned as a stock like-

should not be reckoned as a stock likely to pay in the future more than \$4 or \$5 per annum, and its maximum price from present development and prospects should be under \$60."

Certainly the earnings of the company shall, in future, be governed entirely by facilities for the reduction of its ore bodies. They are enormous. At present there is being reduced 700 tons of ore with an output of over 50,000 pounds of copper bullion containing gold and silver daily. The next enlargement of the smelter will be such as to enable it to reduce 1000 tons daily. To supply that volume of ore it will be To supply that volume of ore it will be no more difficult than is it the pres-ent. The mine is a leviathan.

THE METAL MARKET.

Silver and Lead Each Record Gains at the Week's Opening.

In the metal market yesterday there was again some sprinting, and while the producer is prepared to stand conpreciative. Under the rule which provides that the market for lead in New York shall be determined by the average at which it ruled in that marke the previous week, it was yesterday morning marked up 10 cents per hundred, or to \$4.20, while silver, which closed at 56% on Saturday last, was advanced three points to 57% cents an At these figures heavy settlements were made in the local market with producer and the man who reduces his output on exceedingly cordial terms when the day closed.

GOLDFIELD STRIKES.

Another Shower of Them Recorded at Camp Last Week. The News, in its summary of the week

at Goldfield, Nev., says: "In a week crowded with strikes of the most sensa-"In a week tional nature since the discovery of the district, probably the most important is the one which was made Wednesday night in the Bowes-Kernick lease on the Jumbo. In the crossout on the 200-foot level the ledge was broken into and found just where it should be. The ore shows the same high values—from £0 to \$1500, as was found above, some of the rock being fairly alive with free gold. This strike proves that the Jumbo vein goes down and is one of the strongest demonstrations yet made of the richness and permanence of this great camp.

"One of the good things for this week is the strike made in the Red Top. In the cast drift, which is now in eighty feet, as twelve-foot ledge that assayed \$11.00 \text{ as a run through. This ore could be screeged down into shipping stuff, but the company thinks best to save the heavy freight charges and will walt for a mult to work this class of ore." in the Bowes-Kernick lease on the Jumbo

RICH SAMPLES OF COPPER.

Shipment of Ore to Be Made to Salt Lake for Treatment.

Special to The Tribune. CALIENTE, Nev., Aug. 29,-F. J. Cronin, owner of the Los Angeles group of gold-copper claims near Goode Springs, came through camp today with some of the richest samples of copper ore ever found in Nevada. His ledges are ever found in Nevada. His fedges are cight, six and eleven feet wide. The copper is native and azurite, with one ledge of black oxide. He has 400 feet of work completed and expects to continue work steadily until enough ore is on hand for a large shipment to the Salt Lake smelters for treatment. Frank Buck of Ogden is backing him financially.

Bingham 2.21 27.37½ 26.25 27.25
Mercur 39 33 1.50
Mexico 11.75 11.50 through camp today en route to their through camp today en route to their claims below Los Vegar. They have a gold-silver property on which they have a gold-silver propert

to the claims and continue work. He is backed financially by Vaughan & Wheel-er, Denver real estate and mining men, and will open a double-compartment shaft on an eight-foot ledge of 25 per cent cop-

Joe Fuller and Matt Brown came in from their U. S. group today, with five sacks of free gold ore and gold-silver, taken from their rich ledges. The claims are seuth of Moapa and these men have a lease and bond on them from "Doc" Merril land Joe Chalmers, the owners. They report success in taking out rich ore in quantity.

E. & F. SHIPMENTS.

Lead and Silver Ores Follow Recent Consignment of Copper.

The management of the E. & F. Mining company's properties out of Ploche, Nev., is at the sampler with another lot of ore, this consignment consisting of an argentiferous-lead product, running well up in copper and from the same ledge in which occurs the very high grade copper ore that comes to the right grade copper for that ones of the valley smelters. According to camp assays, said Col. A. C. Ellis, the president of the company, the lot should show from 40 to 60 ounces silver. 15 per cent lead and from 11 to 15 per cent copper per ton. The width of the ledge varies from six to fifteen feet, said the Col-mel, and he has no doubt whatever of its future productiveness. While ores being extracted at this point a new oody is being opened up at another soint in the group consisting of four-cen locations, and with railway transportation he promises to reproduce the history of former days in that locality.

Mining Notes.

The management of the Yampa smelter in Bingham canyon appeared on the market with three carloads of copper, gold and silver-bearing matte during the day. The Mammoth of Tintle marketed niney-two tons of ore yesterday on controls howing \$19 gold, with 5 cunces silver, per

Manager C E Loose of the Grand Central, who came in from that Tintic bonanca yesterday, reports the main shaft dropping down with good progress. W. W. Armstrong has returned from irk City.

Cashler Hayes of the Utah Copper com pany added the proceeds of three more cars of high-grade copper concentrates to the contents of the treasury during the

Maj. R. G. Wilson of the New York Bo-namas of Fark City has returned from San Francisco, much improved in health, and will depart for camp in a few days. John A. Kirby, superintendent of the Daly West is down from that benanza again, much pleased with its condition, The South Swansea of Tintie will be on the market today with three carloads of ore showing 20 ounces silver and 9.5 per cent lead, the consignment running well up in iton.

New York of Purk City yesterday sold for \$250.1. The donkey hoist is now in ostition, and much better progress will be made in sinking the winze below the 100-foot level on ore.

Clarence E Allen, superintendent of the United States, left for Bingham yester-

Hon. R. C. Lund, who is back from Mo-ona, reports a great deal of interest in the new discoveries out of that station. Charles Vadner of Battle Mountain, Nev., is in town again.

Nev., is in town again.

Reno (Nev.) Gazette: According to a message from Tonopah, received today by the Gazette, traffic on the Tonopah road will be opened by Sunday or Monday. The wire says that in all about ten miles of track was washed away, but that most of it has been replaced by the large force of men that is at work night and day.

Co-operation of shareholders of Daly West Mining company is invited for the purpose of organizing a Shareholders' Protective Committee. The committee to ask for proxies for the annual election, examine property, investigate present management and advise measures for the protection of shareholders. ures for the protection of shareholders.
